We require an experienced technical / functional resource to lead the delivery of a number of business critical enhancements, largely focused on the Global Payroll module of the HR PeopleSoft application. Our client is a major financial institution that has recently upgraded to v9.0 of PS HRMS and is in the process of defining its project 'book of work' for the remainder of the financial year. As such, we require an experienced developer with proven delivery experience in the local market to assist our team deliver this program of work through a combination 'hands-on' design / coding and also mentoring and guiding team members in defining quality solutions so that the spread of knowledge is maximised and customer expectations are exceeded.

Essential Technical Skills

- Strong PS Global Payroll knowledge v8.8 / v8.9 / v9.0
- PS GP AUS extension exposure for at least 3 years.
- Solid understanding of Payroll processes of Australia particularly in the Financial Service sector.
- Supported / implemented the PS GP AUS 8.8 / 8.9 / 9.0 for at least 3 years.
- Configuration knowledge in the area of PS GP AUS.
- Knowledge on Variable Compensation, Salary packaging and taxation structure of AUS.
- Knowledge on the PS HRMS processes and the integration with GP.

Desirable technical skills

- Knowledge on Time and Labour module.
- Payroll- GL interface Technical knowledge on writing SQL queries.
- Technical knowledge on PS Queries, Tree Manager, Application Designer. Technical knowledge of tracing GP Cobol

Soft Skills

- Ability to work in fast paced, dynamic environment
 - Self-starter with ability to manage workload to meet challenging delivery timeframes
 - Ability to mentor / guide / up-skill other team members
 - Strong communication skills as need to interact with customer contacts at all levels (i.e. senior executive through to business analysts / end-users)
-
